Profile

Flutter Developer with 5+ years of experience designing, building, and delivering high-performance mobile applications, from technical architecture to production release. Strong expertise in Clean Architecture, advanced state management, native integrations, and scalable mobile solutions. Experienced in leading end-to-end product development for applications reaching thousands of active users. Comfortable working in startup environments with strong requirements around quality, delivery speed, and scalability.

Technical Skills

Architecture & Design Patterns: Clean Architecture, MVVM, modular architecture, Platform Channels, Method Channels

State Management: Provider, Riverpod, BLoC

Networking & APIs: REST APIs, Dio, error handling, retry strategies

Persistence & Offline: Drift/SQLite, offline-first architecture, `flutter_secure_storage`

UI & Rendering: Advanced animations, AnimationController, CustomPainter, Rive, Lottie, responsive design, internationalization with `intl` and ARB, dynamic themes

Native Integrations: Flutter native plugin development with Kotlin/Swift, push notifications with FCM and APNs, deep linking, native permissions

Testing: Unit tests, widget tests, integration tests, Mocktail

Tooling & Code Generation: `build_runner`, Freezed, `json_serializable`, flavors for dev/staging/prod, feature flags

CI/CD & Monitoring: GitHub Actions, CodeMagic, Shorebird OTA, Sentry, Firebase Analytics

Performance: Flutter DevTools, CPU and memory profiling, frame analysis, lazy loading, pagination, list optimization, deferred components

Security: Secure storage, code obfuscation

Collaboration & Quality: Git, code review, pair programming, Agile teamwork, App Store and Google Play publication

Professional Experience

Freelance Mobile Developer

January 2025 – Present

Wael Academy, Monastir

- Designed and developed a complete e-learning platform for web and mobile using Flutter and Supabase.
- Built key features including live classes with Zoom integration, course management, subscriptions, and dashboards for administrators and teachers.
- Scaled the platform to approximately 8,000 users with around 200 active monthly subscriptions.
- Worked closely with stakeholders to iterate on features and ensure a reliable, user-friendly learning experience.

Mobile Developer

February 2023 – Present

Pura Solutions, Sousse

- Led the full mobile development of NAEST, a logistics application for a French startup.
- Implemented key features including GPS tracking, real-time shipment status, Stripe payments, and push notifications.
- Designed an intuitive user interface based on customer feedback to improve usability and retention.
- Collaborated with stakeholders to iterate on features, resolve bugs quickly, and deliver a reliable and scalable application.

Freelance Full Stack Developer

July 2024 – August 2025

Sokari Care, Nabeul

- Developed SoK'ari, a Flutter mobile application designed to support and educate diabetic patients.
- Built and maintained an Express.js backend for authentication, data processing, and SQL database operations.
- Reached more than 1,000 users within the first month, demonstrating strong adoption and engagement.
- Collaborated with clients to define requirements, iterate on design, and deliver functional, user-friendly solutions.
- Conducted user testing and used feedback to continuously improve usability and features.

Freelance Mobile Developer

January 2024 – June 2024

XoSpace, Saudi Arabia

- Contributed to the development of LOLCards, a feature-rich card game with real-time player synchronization using SignalR.
- Designed and implemented smooth animations and push notification systems, improving user retention by 50%.
- Collaborated with a multidisciplinary team on product design, development, testing, and delivery.

Part-Time Lecturer

October 2023 – June 2024

Faculty of Sciences of Monastir, Monastir

- Taught Python and C programming to an average of 50 undergraduate students per semester, providing a strong foundation in programming concepts.

Remote Mobile Developer

December 2022 – November 2023

Bridella, Monastir

- Developed a Flutter application giving users simplified access to wedding-related services, including planning, marketplace features, and wish lists.
- Integrated the application with a database providing access to a wide range of service providers and suppliers.

Co-Founder & Mobile Developer

February 2022 – January 2024

Servini Solution, Sousse

- Contributed to the development of Servini, a booking application designed to increase restaurant revenue and improve the customer experience.
- Helped the startup obtain the Startup Act label from the Ministry and onboard more than 5 partner clients.
- Collaborated with developers to update more than 3 software applications and build new features using Flutter and Firebase.

Education

Research Master's Degree in Computer Science – Artificial Intelligence

2021 – 2023

Faculty of Sciences of Monastir

- Developed a deep learning model for automated mass segmentation in mammographic images using a VGG16-UNet architecture. The project used the CBIS-DDSM and INbreast datasets to train the model to identify potential breast masses.

Bachelor's Degree in Computer Science

2018 – 2021

Faculty of Sciences of Monastir

- Developed an educational mobile application simplifying the process of finding, planning, and connecting with tutors for online learning sessions.
